

CREATE YOUR OWN PAPER BAG TREE

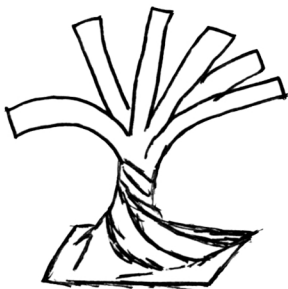

STEP 1:

Begin with your paper bag flat, and use scissors to carefully make several long cuts from the top (open end) of the bag. Be sure not to cut past halfway down the bag (see below).

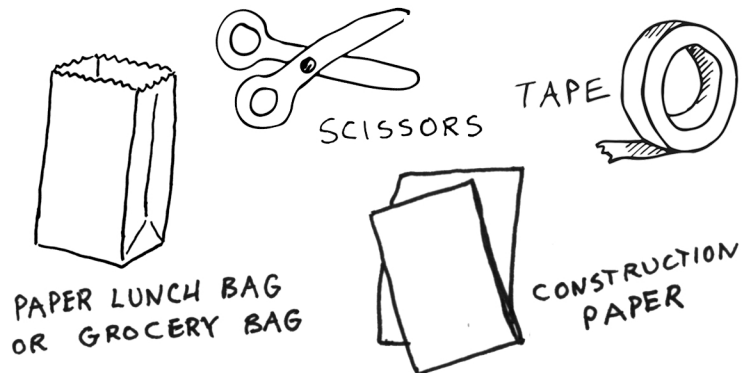

STEP 2:

After you are finished with your cuts, open up the bag. Hold the bottom of the bag as you twist the middle of the bag to form the trunk of your tree.

WHAT YOU NEED

STEP 3:

Now twist each individual cut strip to create branches for your tree. Feel free to use tape as needed to hold things in place.

STEP 4:

Cut or tear leaf shapes out of construction paper, and add them to your branches. Get as creative as you like in decorating your new tree!
